## Clean Version of Claims

ci	1	1.	(Thrice Amended)	An indwelling intravascular device for insertion into the bodily tissue
	2 and vessel of a medical patient, comprising:			
	3		a body including an	interface and a cannula;
	4		said cannula for ext	ending into and terminating in the vessel;
	5		said body for at leas	partial insertion into the bodily tissue at a point of insertion;
	6		said interface being	g the portion of said body which remains in contact with said
	7		bodily tissue adjacer	nt said point of insertion while the device remains inserted in the
	8		bodily tissue;	
	9		said interface havin	g an exterior surface including texture thereon.
				·
	1	5.	The indwelling intra	vascular device of claim 1 wherein plurality of bumps are positioned on
	2 the exterior surface of said interface.			
	1	6.	The indwelling intra	avascular device of claim 5 wherein the bumps are rounded.
	1	7.	The indwelling intra	avascular device of claim 5 wherein the bumps are pointed.
	1	8.	The indwelling intr	avascular device of claim 1 further including a wire guide obturator
	2	having	a first end and a terr	ninal end;
3 ·			said first end being	secured to said interface;
	4		said first end includ	ing texture thereon.
				1

10. (Twice Amended) An intravenous stent for insertion into the bodily tissue of a n	nedical				
/					
2 patient at a point of insertion, comprising:					
3 a stent portion;					
4 said stent portion capable of receiving said needle therethrough:					
said stent portion including an introducer and a cannula through which said needle ex	tends;				
6 said introducer including a proximal portion and a distal portion;					
7 a segment of said proximal portion for contact with the bodily tissue at the point of ins	ertion;				
8 said introducer including texture on said segment of said proximal portion for conta	ct with				
the bodily tissue at the point of insertion.					
1 11. The intravenous stent of claim 10 wherein a portion of said cannula includes texture the	iereon.				
1 12. The intravenous stent of claim/11 wherein a portion of said cannula adjacent said intr	oducer				
2 is textured.	is textured.				
1 15. The intravenous stent of claim 10 wherein said texture includes a plurality of	bumps				
2 positioned on its exterior surface.	tioned on its exterior surface.				
1 16. The indwelling intravascular device of claim 1 wherein said texture is a static texture	•				
1 16. The indwelling intravascular device of claim 1 wherein said texture is a static texture	С.				
1 17. The indwelling intravascular device of claim 1 wherein the depth of the majority	of said				
3					

- 2 texture is between the range of 0.2 mm to 1.0 mm.
- 1 18. The indwelling intravascular device of claim 17 wherein the depth of the majority of said
- 2 texture is between the range of 0.2 mm to 0.5 mm.
- (New) An intravasular device for insertion and retention in a severed vessel, comprising:
  - a body, including an interface and a cannular;
  - said cannular for extending into and terminating in the severed vessel;
  - said interface being the portion of the body which contacts the severed vessel;
  - said interface having an exterior surface having texture thereon.
  - 1 20. (New) The intravasular device of claim 19 wherein the majority of said texture is between
  - 2 the range of 0.2 mm to 1.0 mm.
  - 1 21. (New) The intravasular device of claim 19 wherein the majority of said texture is between
  - 2 the range of 0.2 mm to 0.5 mm.

## REMARKS

In the final Office action, claims 1, 5-8, and 10-18 are pending in the application. Claims 1, 5-8, and 10-18 are rejected. Claims 1 and 10 are rejected under 35 U.S.C. § 102(e). Claims 5-8 and 10-18 are rejected under 35 U.S.C. § 103(a). Reconsideration and allowance of claims 1, 5-8, and 10-18, as amended herein, is respectfully requested.
